

SiteFM™ EVS Manager

Proven, Affordable Solutions for the EVS Professional

Top Ten Reasons to Use EVS Manager

1 ECONOMIC PRESSURES

SiteFM EVS Manager pinpoints productivity opportunities in your operation that will improve cleaning times and support targeted executive decisions - relieving economic downturn pressures to perform better and with less money budgeted.

2 GREATER AFFORDABILITY

Expensive patient tracking solutions have jumbled cleaning productivity into a high-risk hospital decision. With EVS Manager, professionals target bed cleaning with a niche application that delivers results quickly and inexpensively.

3 NO LENGTHY CONTRACT COMMITMENTS

EVS Manager can be purchased with a month-to-month commitment. Our low set-up fee and low monthly subscription (dollars per day) allows your facility to reap the benefits of a techno-savvy system without a lengthy contract.

4 NO EXTRA EQUIPMENT NEEDED

EVS Manager leverages your facility's current equipment for operation. All that is needed are telephones and computers with internet connectivity.

5 MINIMUM DISRUPTION DURING INSTALLTION

EVS Manager can be activated in place of most manual and/or automated bed tracking systems found in any size healthcare facility. With minimal training required, EVS Manager can be utilized within weeks of purchasing.

6 MAINTAIN VISIBILITY

With real-time visibility of all beds within the facility, EVS professionals are instantly aware when performance it not equal to your organization's commitments.

7 REDUCE ADMINISTRATIVE OVERHEAD

With a flexible reporting capability by group, individual housekeeper, time, shift and comparison to average, you can identify bottlenecks and use the found time to focus on improving your housekeeping operation.

8 HISTORICAL DATA BACKED UP DAILY

As part of our service, your historical, trended data is backed up daily from our secure data centers. Your data can be recovered from our back-up at any time.

9 BUDGET BASED ON HISTORICAL PERFORMANCE DATA

The EVS Manager trended data allows an EVS professional to target productivity improvements based on data rather than generalized FTE per square foot metrics.

10 FUTURE EXPANSION BUILT-IN

The EVS Manager application is a hosted (SaaS) delivery model that allows all users access to reports and real-time data. Implementing facility-wide usability can further reduce manual communication overhead and synchronize operations. Administration, Transfer and Discharge (ADT) system integration is also available to automatically update occupancy and link to your existing systems.
