Site FM – Web-Based Healthcare Maintenance Management Solutions.

SiteFM™ Healthcare Maintenance Management Systems provide Healthcare Facility Managers with the tools to take control of their facilities and drive efficient operations. SiteFM™ includes easy-to-use programs to manage requested, preventative, and automated maintenance work orders, as well as utility, life safety, and other EOC management items. SiteFM™ systems make continuous compliance tracking for The Joint Commission's Environment of Care, NFPA 99 and NFPA Life Safety Code easily manageable. Designed specifically for the unique healthcare environment, SiteFM™ is ideal for hospitals and other healthcare facilities.

SiteFM™ Work Order Manager

used by hundreds of healthcare facilities across the US to manage well over **100 million square feet of managed healthcare space**, SiteFM™ is the leading work order solution for small-to-medium size healthcare operations. SiteFM™ Work Order Manager includes web requests with automatic requestor feedback, preventative maintenance (PM) management and compliance tracking with relevant performance indicators. Hosted by Facilities Technology Group on our own servers, this web-based application offers proven ease-of-use and value to small-to-medium size healthcare facilities.

SiteFM™ Benefits

- Healthcare workflow efficiencies built-in
- Unannounced survey readiness (The Joint Commission, OSHA, or Department of Health -CMS)
- Maintain the complex healthcare facility environment with a continuous compliance focus
- Run an effective safety committee with accurate and meaningful reports and data
- Improve compliance levels by having healthcare expertise built-in
- Powerful web-based toolset is easy to purchase, easy to get activate, and easy to use

SiteFM™ Mobile

the latest software technology and Android smart phones team up in SiteFM™ Mobile to provide unprecedented work order mobility and efficiency for all types and sizes of healthcare facilities. SiteFM™ Mobile combines the proven capabilities of SiteFM™ Work Order Manager refocused to optimize performance in larger organizations with powerful new mobile capabilities.

A Mobile Healthcare CMMS built on a History of Healthcare Performance

Additional SiteFM™ Mobile Benefits

- Optimum workflow efficiencies for larger healthcare operations
- Facilitate migration to paperless facilities operations
- Use one toolkit to perform a variety of inspections (contractor use provides instant access to reports)

LifePoint Hospitals®
Mark A. McCormack
Director of Engineering Services

"We own 53 hospitals throughout the country. After a two-year search and multiple beta testing sites we selected *Facility Technology Group – SiteFM Work Order Manager* for our entire organization.

SiteFM is exactly what our hospitals needed. The system is very user friendly, easy to operate and has many drop down windows to keep the user from having to put the same info in continuously. Custom

reports are easy to create and run.

In short, we did a lot of homework looking at CMMS programs and this was the only one that met our requirements. It is a truly a great system.

The service we have received from Facilities Technology Group over the past 5 years has been "outstanding" and I have not received a single complaint from any of our facilities. Training is frequent and readily available due to the web-based system."
